

# Biology for the AP® Course 1st edition

## Resource Materials

**Annotated Teacher's Edition** (print and ebook-available in Achieve, digital platform)

**Unit Resources** (available in Achieve)

- Overview Video--an introduction to the book and resources
- Professional Development videos for each unit offering tips and advice on how to teach with the new Course Framework, what to emphasize in a given Module, how to anticipate and overcome common pitfalls, as well as tips for helping students realize success in the course and on the exam
- The Tutorials each have a professional development video as well to guide you through tried-and-true ways to introduce and integrate quantitative skills in the course
- Illustrative Example - this uses an in-depth look at one biological example or phenomenon to tie together concepts from the unit and apply multiple scientific thinking skills
- Additional Free Response Questions, with answers
- Answers to all Unit Exam questions

**Module Resources**

- Lecture Slide Presentations
- Biology Extras-- a curated list of videos, websites, and other online material referenced in the book
- Hand-outs to accompany activities in the Teacher's Edition margin content, including teaching with graphs activities, enrichment activities, mini-labs, and more.

**Test Bank**

- Over 2200 Questions
- 1 MCQ file per Unit
- 1 FRQ file per Unit
- Each question has been tagged with the Learning Goal and Module to which it applies and to the Science Practice it addresses. The level of difficulty and Bloom's level are also included.
- Delivered via email
