

Boosting Student Success with Multimedia Assessments

Students' average Animation Assessment grade was significantly related to both their final course grade and their average exam grade while controlling for students' high school GPA. Animation Assessments not only matched the course content well but also helped instructors gauge students' understanding and progress effectively. Instructors assigned an average of four Animation Assessments per week.

Study sample

▶ **222** biology major students ▶ **20** courses ▶ **16** instructors ▶ **2** semesters

Students who averaged
95-100% on Animation
Assessments had a

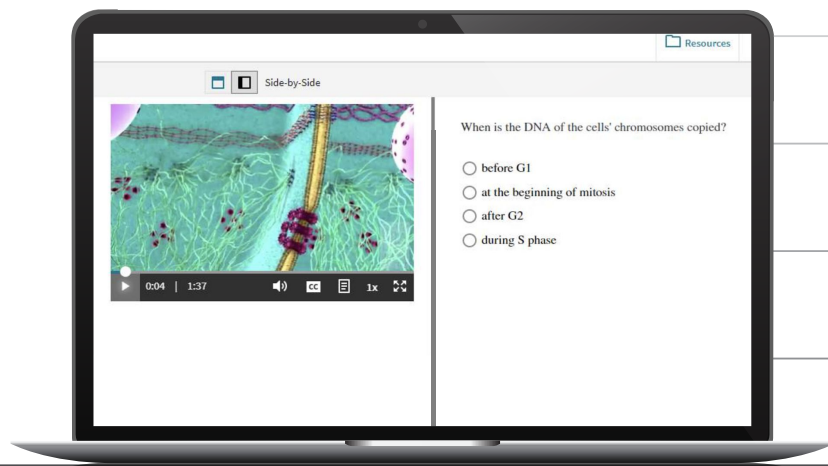

13 pt

increase on their
final course grade

and a

14 pt

increase on their
exam grade

Majors Biology: Morris How Life Works
