## With Cirque, you can

- Get daily reports for early alerts to situations that need immediate responses
- Track and report classroom and event attendance at scale, using iClicker
- Use carefully crafted survey questions to improve retention and success rates
- Easily export data to other campus systems
- Get started in minutes

**COURSES OF INTEREST** // Cirque also helps identify notable attendance trends in specific courses, to help schools allocate resources and analyze drop/withdrawal/failure rates.

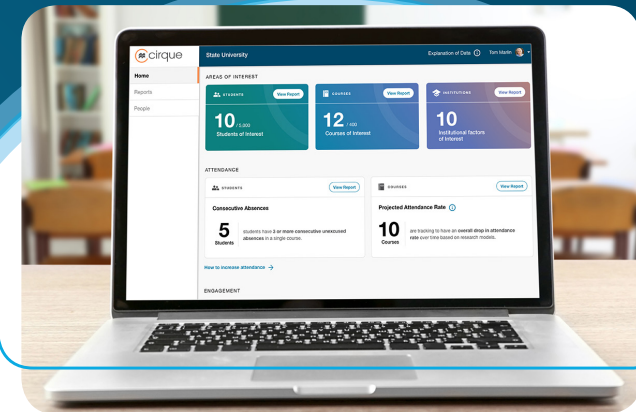

**STUDENTS OF INTEREST** // Cirque brings together attendance data from all campus classes using iClicker to help educators spot potential signs of concern for individual students.

## students

Students use the iClicker mobile app for attendance and engagement — and even to answer short survey questions on non-cognitive retention factors.

- works on a variety of mobile devices and web browsers
- accessible via mobile app or physical remote
- includes virtual study guide for use after class

Combine attendance, engagement and survey data for timely identification of additional student support needs

## instructors

Instructors track attendance and engage students with diverse question types with polling and quizzing, then receive insight on students' class experience.

- take attendance with automated geolocation attendance option
- works with any presentation software or content
- easy to ask questions "on the fly"
- simple, flexible LMS integration

## administrators

Administrators receive analytics on students and courses of interest delivered in the Cirque dashboard

- receive actionable insights on attendance and engagement across the entire institution
- identify early those students who may need additional support
- drill into analytics by student, college, department course and even section
