

Current research you can trust. A book your students will read!

Psychology, fourteenth edition provides the most up-to-date information, including exciting findings, examples and ideas.

The printed textbook is accompanied by the new **Achieve** online learning platform, which includes a complete interactive e-book with integrated students resources, LearningCurve adaptive quizzing, videos, simulations, and PsychSim, curated by the authors themselves.

New to This Edition

New co-author, June Gruber (University of Colorado, Boulder) known for her research on positive emotion and psychopathology, her extensive collaborations with fellow scholars, and her efforts to mentor younger scholars.

Rigorous Updating (1427 citations from 2019–2022) including the latest updates in each of the field's subdisciplines.

Modular Format with each chapter consisting of a series of standalone teaching units. This gives students more manageable reading segments and instructors the option of assignment any or all modules within a chapter in any order.

Improved Student Preface and a NEW Student Success Activity in Achieve to help students start to think critically and to consider the psychology in the context of their own lives.

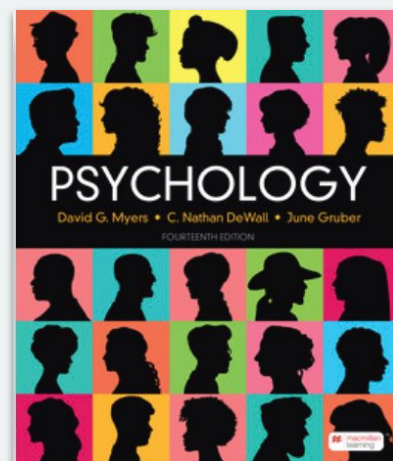

Expanded Video Collection for Introductory Psychology (200 total videos; 132 new) with new videos on loneliness and the brain, iGen, COVID and stress, Black Lives Matter/racial trauma, online dating, and issues faced by transgender youth.

Evolving Coverage of Diversity, Inclusion, Gender, and Sexual Orientation including extra reviews from experts and instructors and extensive refinements in language and photo selections.

Coordination with APA's 2021 Introductory Psychology Initiative (IPI) for instructors interested in following these new guidelines.
New assignable How Do We Know Ourselves essays drawn from David Myers' new trade title.

Improved, easier-to-use Instructor's Resource Manual (IRM) by award-winning teacher Elizabeth Hammer (Xavier University) including a "Diversity in Psychology: Spotlight on Women" collection of 17 activities, as well as two new activities on diversity in psychology by Salena Brody (University of Texas, Dallas).

New research and research design-oriented clicker questions by Jennifer Zwolinski (San Diego University) to help engage students on research topics.

These [LearningCurve quizzes in Achieve] are invaluable for helping students assess their mastery of the material and also for helping me know who needs help."

– Kelly Cate
University of North Georgia

Features You Know & Love

A Trusted Author Team brings a wealth of teaching and research experience to the written text and interactive resources in Achieve.

Critical Thinking Introduced in Chapter 1 and students are encouraged to examine sources and evidence and to consider voices and ideas from diverse perspectives throughout.

Always Remarkably Current to help students walk away with the most accurate, current understandings of psychology to apply in their own lives and work.

A Global Perspective with the authors offering a world-based psychology for their worldwide student readership.

An Effective Study and Learning System—in the text and Achieve—that exemplifies best practices from learning and memory research.

Author-Created Achieve Activities

- **How Would You Know?** shows how psychological research begins with a question—and how key decision points can alter the meaning and value of a psychological study.
- **Assess Your Strengths** let students apply what they are learning to their own experiences.
- **"Thinking Critically About..."** Infographic Activities guide students to consider available empirical evidence before drawing conclusions.
