Featured in Achieve

Worth Video Collection for *Abnormal Psychology*

Included in Achieve at no extra cost, this extraordinary collection of over 300 sought-after clips spans the full spectrum of abnormal psychology, including groundbreaking research and captivating stories of real people experiencing psychological dysfunction. As focal points in lectures or as engaging homework assignments, these videos help students develop deeper connections to the field of abnormal psychology.

E-book

The interactive version of the textbook offers highlighting, bookmarking, and note-taking functionality. Built-in, low-stakes self-assessments allow students to test themselves along the way, and learn even more in the process thanks to the testing effect. Students can download the e-book to read offline, or to have it read aloud to them. Achieve allows instructors to assign chapter sections as homework.

Clinical Choices

In these immersive learning activities, students take the role of clinician, engaging with virtual clients to identify the symptoms of psychological disorders (based on DSM-5 criteria) and to consider diagnosis and treatment options.

LearningCurve

In a game-like format, LearningCurve adaptive and formative quizzing helps get students more deeply involved in the coursework. It offers each student:

- A unique learning path, with quizzes shaped by each individual's correct and incorrect answers.
- A Personalized Study Plan to aid each individual's preparation for class and for exams.
- Feedback for each question with live links to relevant e-book pages, guiding students to the reading they need to do to improve their areas of weakness.

iClicker Questions

iClicker is now integrated with Achieve for easy access for you and your students.

Gold Standard Instructor Resources

Now in Achieve, these resources are all designed to help instructors actively engage students in a variety of class settings and help them retain psychology's key concepts. Resources include new Instructor Activity Guides for each chapter, offering everything you need to implement fun in-person or remote classroom activities.

Now available in Achieve!

Case Studies in *Abnormal Psychology*, Third Edition Ethan E. Gorenstein and Ronald J. Comer

Give your students unique insights into the human behavior by adding this collection of case histories to Achieve. Each of these 20 case studies covers a real individual's history and symptoms and includes a theoretical discussion of treatment, a specific treatment plan, the actual treatment conducted, and assessment questions. The e-book format includes highlighting, bookmarking, and note-taking functionality.
