

Educators' Guide To

Evidence-Based Strategies for Elevating Student Engagement

for Chemistry

Chemistry Instructors: Here are some proven strategies for engaging students before, during, and after class — and how Macmillan Learning's Achieve helps you implement these strategies.

below

STRATEGY 1

Goals have to be set before they can be met.

STRATEGY 2

Help students develop time management skills.

STRATEGY 3

Get the insight you need to course correct for your students.

STRATEGY 4

Use active learning activities that create lively classes.

STRATEGY 5

Ask students what they think in real time.

STRATEGY 6

If showing up is half the battle, reward student attendance.

STRATEGY 7

Tailor assignments to the learner, while keeping everyone on the same page.
